

# FirstMRI™

## *Meeting Your Imaging Needs*

### Facility Based MRI

Are you doing your patients and physicians justice by providing MRI service only 1 day a week? Having a full-time scanner will enhance the quality of care, convenience and timeliness of diagnosis & treatment for your patients. The end result is a more satisfied patient and a more profitable facility.

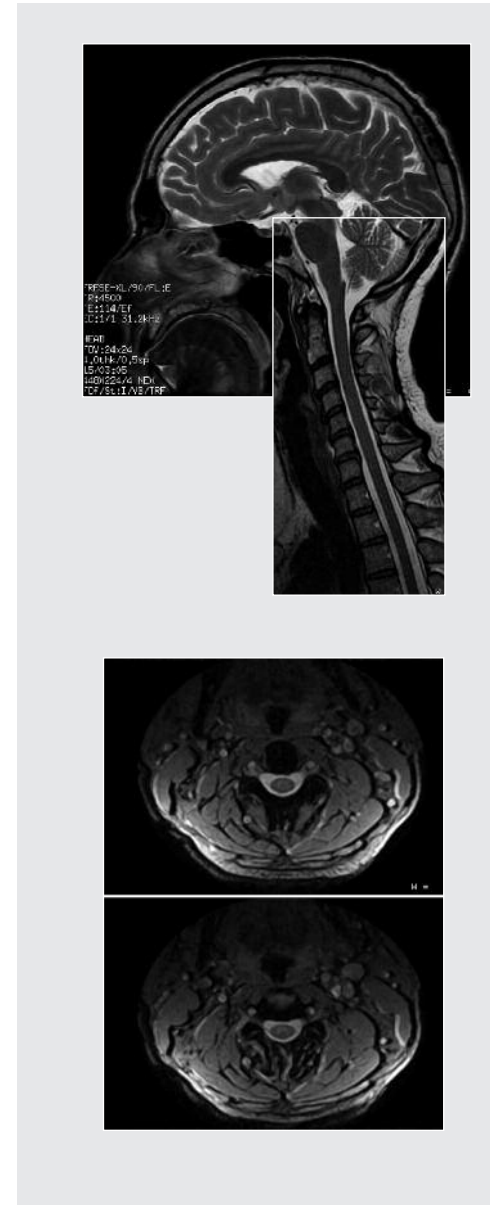

FirstMRI™ is a total comprehensive program that provides state-of-the-art MRI imaging at your facility. With this complete turnkey program you can now establish an in-house MRI program without the usual financial risks, staffing costs and administrative headaches. Let our professionals show you how it can be done.

FirstMRI™ has one simple goal: to help you provide the best technology available to your patients and your community. We stand behind our services and provide on-going support to our customers as their needs change.

Our site-planning department will provide all necessary siting requirements needed for the proper installation and operation of the equipment, including RF shielding, electrical requirements, layout, and floor loading.

Today we serve hundreds of clients nationwide, each with unique arrangements specific to respective business needs and market demands. You can be confident in our commitment to client satisfaction and to meeting your specific needs with solutions that address your technology and cost concerns.

By tailoring solutions to meet those specific needs, we have successfully assisted hundreds of clients in expanding their service levels, upgrading technology, increasing returns, minimizing risks and conserving capital.
